

Manage Hydrocarbons

Presentation Overview

<Insert Company
Logo>

- What is a hydrocarbon?
- Why is hydrocarbon management important?
- Hydrocarbon storage requirements
- Spill response equipment and procedures
- Bioremediation
- Hydrocarbon hazards, incidents and reporting
- Assessment

What is a hydrocarbon?

<Insert Company
Logo>

Chemicals which are made up of Hydrogen and Carbon

Source of energy, which when burnt produce carbon dioxide and water.

Essential resource which enables us to undertake work

Require appropriate management to avoid spills/contamination.
